M2 Diamond Coated Blades

The most innovative
technology in razor
blade slitting in 10 years.

**Order your 25pc. trial lot
today for only \$100 and test
the most innovative tech in
film slitting in 10 years**

Benefits of the M2 Diamond Coated Blades:

- Lasts 16x longer than steel blades
- Lasts 2-3x times longer than ceramic coated steel blades
- Lowest coefficient of Friction from diamond coating
- Safer than uncoated blades
- Decreased downtime and increased time between blade changes
- Better quality edge cuts
- Improved film properties caused by cleaner edge cuts
- Less film breaks caused by poor blades
- Less expensive than solid ceramic blades and will not break

Great for these films:

- Polypropylene
- Low Density Polyethylene
- PVC Films
- Foils and Laminates
- White Films
- High Density Polyethylene
- OPP Films
- LLDPE Films
- Polycarbonates
